PRELIMINARY ASSESSMENT COVER SHEET  
GEORGIA PACIFIC CORPORATION PLYWOOD  
MONTICELLO, GEORGIA - JASPER COUNTY  
GAD057270449

A. HISTORY OF SITE

The Georgia Pacific Corporation Plywood Facility is located in Monticello, Georgia in Jasper County. Since 1972 this facility has been engaged in producing commercial plywood from veneer which is produced at an adjoining facility. The subject facility has always been owned and operated by the Georgia Pacific Corporation headquartered in Atlanta, Georgia. Private landfilling of log yard waste, fly ash and scrubber sludge began in the early 1970's. Closure of the Georgia Pacific's Solid Waste Landfill by GA EPD was completed on 2/7/79. Residual wastes have since been recycled and used as a fuel in their steam plant operations.

B. NATURE OF HAZARDOUS MATERIALS

No hazardous waste is generated at this facility.

C. DESCRIPTION OF HAZARDOUS CONDITIONS, INCIDENTS, PERMIT VIOLATIONS

On January 16, 1976 Georgia Pacific obtained a solid waste handling permit to continue to operate their private disposal site. On February 2, 1979 the Georgia EPD closed this site under the Georgia Rules and Regulations for Solid Waste Management. No violations or hazardous incidents have ever been documented at this facility.

D. ROUTES FOR CONTAMINATION

Not Applicable

E. POSSIBLE AFFECTED POPULATION AND RESOURCES

None

F. RECOMMENDATIONS AND JUSTIFICATIONS

A "no priority" for a Site Inspection is recommended for this facility based on the following conclusions:

Waste types generated and disposed on site since operations began consist of log yard waste, fly ash and scrubber sludge. Georgia EPD inspections of the facility have determined the waste types to be non-hazardous and acceptable for land disposal. Georgia Pacific's Part A application for a Hazardous Waste Handling Permit has been formally withdrawn. A small quantity generator status has been assigned to this facility in the event that hazardous waste is generated in the future.

Re: Part A (Interim Status) Withdrawal Request  
Generator Notification Withdrawal Request

Dear Mr. Rose:

As we discussed, Georgia-Pacific formally requests the withdrawal of its Part A RCRA permit applications (or interim status), for the Georgia-Pacific locations shown on the enclosed sheet.

At the time these applications were filed with EPA, it was felt there may be the need for a small storage facility at these locations, however, as indicated below, this need never materialized and, based on present and projected operating conditions, we do not anticipate the need for such facilities.

Also, we request that our status as a generator of hazardous waste at these locations, including those locations which notified as generators only, be changed to inactive status since we have determined that no hazardous waste is generated. This determination has been made as the result of test, change in product formulation or simply because some wastes were never generated. We still want to retain our EPA I. D. numbers in the event hazardous waste is generated in the future.

Your early review of our request will be appreciated. Please let me know if there are any questions.

Very truly yours,

Gerald W. Tice  
Senior Environmental Engineer  
Southern Division

February 21, 1979

Mr. Gerald W. Tice  
Environmental Engineer  
Georgia-Pacific Corporation  
Southern Division  
P. O. Box 1808  
Augusta, Georgia 30903

Dear Mr. Tice:

Reference our facility investigation of hazardous and solid waste management practices on February 7, 1979 of the Georgia Pacific Plywood Plant located in Monticello. Your industrial land disposal site has been marked "closed". Your company is commended for developing your large steam plant which uses plant wood wastes as fuel. Solid waste management practices at this plant are considered, at present, to be in compliance with Georgia Rules and Regulations for Solid Waste Management.

We are not presently requiring a land disposal permit for accumulations on plant grounds of log yard waste, fly ash, and scrubber sludge. In the coming months, your company is encouraged to develop a means of separating sand and dirt from the bark generated in the log yard. Possibly a trommel system might be effective in this separation, which could lead to the burning of the bark in your steam plant.

Your interests and cooperation in the proper management of Georgia's environment are very much appreciated.

Sincerely,

Clyde F. Fehn  
Environmental Engineer  
Industrial & Hazardous Waste  
Management Program

REFERENCE FIR Investigation Date 2/7/79 and letter to Tice re. same.					
PROGRAM ACTIVITY Inspection and Compliance, Industrial (03)					
ACTIONS		FINDINGS / DECISIONS		NEXT ACTIONS	
Inspection, Initial (34)		Facility Not in Violation (71)		Inspection, Routine (38)	
<p><u>COMMENTS, CONCLUSIONS, AND RECOMMENDATIONS:</u> During the inspection the following waste streams and their respective handling practices were noted. See FIR for volumes and more details.</p> <p>(1) <u>Log yard wastes.</u> This material consists of bark and sand. Because of the large amount of sand, this waste stream presents no environmental problems as it is currently being handled by area filling. However, care must be taken to preclude damage to the settling lake through encroachment by the mass of bark waste. Considering the large amount of the waste generated by Ga. Pacific nationally, it is highly recommended that methods of profitably marketing this unutilized resource be undertaken. Current land disposal practices will be increasingly expensive and difficult to manage properly as the mass</p>					

COMMENTS, CONCLUSIONS, AND RECOMMENDATIONS (CONT.):

of waste increases. Utilization of a trommel system may prove effective in separating the sand and dirt from the clean bark.

- (2) Fly ash and scrubber sludge. This waste presents no environmental problems as currently handled by sub-surface land application. A long-term management plan for this waste by recycling through AMAX Resource Recovery Systems is more suitable, however, and is recommended.
- (3) Scrap Metal. Continued recycling of scrap metal is acceptable and encouraged.
- (4) Old landfill. The site has been properly closed by appropriate grading and initial steps in establishment of permanent vegetation. Periodic maintenance, especially after heavy rainfall, is necessary to prevent erosion. See LF Evaluation Report 2/7/79.

Conclusions:

- (1) Solid waste management practices are considered in compliance with Ga. Rules and Regulations for Solid Waste Management.
- (2) We should not presently require a land disposal permit for accumulations on plant grounds of log yard waste, fly ash, and scrubber sludge.

Recommendations:

- (1) Send the company a letter stating that they are in compliance with Georgia Rules and Regulations.

										(specify) Cyclone State Operation Permit									

## XI. MAP

Attach to this application a topographic map of the area extending to at least one mile beyond property boundaries. The map must show the outline of the facility, the location of each of its existing and proposed intake and discharge structures, each of its hazardous waste treatment, storage, or disposal facilities, and each well where it injects fluids underground. Include all springs, rivers and other surface water bodies in the map area. See instructions for precise requirements.

## XII. NATURE OF BUSINESS (provide a brief description)

"This establishment is primarily engaged in producing commercial plywood from veneer produced in the same establishment."

## XIII. CERTIFICATION (see instructions)

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attachments and that, based on my inquiry of those persons immediately responsible for obtaining the information contained in the application, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

<b>FORM 1</b> <b>GENERAL</b>	<b>U.S. ENVIRONMENTAL PROTECTION AGENCY</b> <b>GENERAL INFORMATION</b> <i>Consolidated Permits Program</i> <i>(Read the "General Instructions" before starting.)</i>	<b>I. EPA I.D. NUMBER</b> <div style="border: 1px solid black; padding: 2px;">             F G A D 0 5 7 2 7 0 4 4 9           </div>
<b>LABEL ITEMS</b> <b>I. EPA I.D. NUMBER</b> <b>III. FACILITY NAME</b> <b>V. FACILITY MAILING ADDRESS</b> <b>VI. FACILITY LOCATION</b>	<div style="border: 1px solid black; padding: 10px; width: 100%;"> <p style="font-size: 2em; opacity: 0.5;">0000004</p> <p style="font-size: 1.5em; opacity: 0.5;">RECEIVED</p> <p style="font-size: 1.5em; opacity: 0.5;">FACILITY</p> <p style="font-size: 1.5em; opacity: 0.5;">PLEASE PLACE LABEL IN THIS SPACE</p> <p style="font-size: 1.5em; opacity: 0.5;">NOV 15 1980</p> <p style="font-size: 1.5em; opacity: 0.5;">EPA REGION 4</p> </div>	<b>GENERAL INSTRUCTIONS</b> <p>If a preprinted label has been provided, affix it in the designated space. Review the information carefully; if any of it is incorrect, cross through it and enter the correct data in the appropriate fill-in area below. Also, if any of the preprinted data is absent (the area to the left of the label space lists the information that should appear), please provide it in the proper fill-in area(s) below. If the label is complete and correct, you need not complete items I, III, V, and VI (except VI-B which must be completed regardless). Complete all items if no label has been provided. Refer to the instructions for detailed item descriptions and for the legal authorizations under which this data is collected.</p>

**II. POLLUTANT CHARACTERISTICS**

**INSTRUCTIONS:** Complete A through J to determine whether you need to submit any permit application forms to the EPA. If you answer "yes" to any questions, you must submit this form and the supplemental form listed in the parenthesis following the question. Mark "X" in the box in the third column if the supplemental form is attached. If you answer "no" to each question, you need not submit any of these forms. You may answer "no" if your activity is excluded from permit requirements; see Section C of the instructions. See also, Section D of the instructions for definitions of bold-faced terms.

SPECIFIC QUESTIONS	MARK 'X'			SPECIFIC QUESTIONS	MARK 'X'		
	YES	NO	FORM ATTACHED		YES	NO	FORM ATTACHED
A. Is this facility a publicly owned treatment works which results in a discharge to waters of the U.S.? (FORM 2A)		X		B. Does or will this facility (either existing or proposed) include a concentrated animal feeding operation or aquatic animal production facility which results in a discharge to waters of the U.S.? (FORM 2B)		X	
C. Is this a facility which currently results in discharges to waters of the U.S. other than those described in A or B above? (FORM 2C)		X		D. Is this a proposed facility (other than those described in A or B above) which will result in a discharge to waters of the U.S.? (FORM 2D)		X	
E. Does or will this facility treat, store, or dispose of hazardous wastes? (FORM 3)	X		X	F. Do you or will you inject at this facility industrial or municipal effluent below the lowermost stratum containing, within one quarter mile of the well bore, underground sources of drinking water? (FORM 4)		X	
G. Do you or will you inject at this facility any produced water or other fluids which are brought to the surface in connection with conventional oil or natural gas production, inject fluids used for enhanced recovery of oil or natural gas, or inject fluids for storage of liquid hydrocarbons? (FORM 4)		X		H. Do you or will you inject at this facility fluids for special processes such as mining of sulfur by the Frasch process, solution mining of minerals, in situ combustion of fossil fuel, or recovery of geothermal energy? (FORM 4)		X	
I. Is this facility a proposed stationary source which is one of the 28 industrial categories listed in the instructions and which will potentially emit 100 tons per year of any air pollutant regulated under the Clean Air Act and may affect or be located in an attainment area? (FORM 5)		X		J. Is this facility a proposed stationary source which is NOT one of the 28 industrial categories listed in the instructions and which will potentially emit 250 tons per year of any air pollutant regulated under the Clean Air Act and may affect or be located in an attainment area? (FORM 5)		X

#### IV. DESCRIPTION OF HAZARDOUS WASTES

- A. EPA HAZARDOUS WASTE NUMBER** — Enter the four-digit number from 40 CFR, Subpart D for each listed hazardous waste you will handle. If you handle hazardous wastes which are not listed in 40 CFR, Subpart D, enter the four-digit number(s) from 40 CFR, Subpart C that describes the characteristics and/or the toxic contaminants of those hazardous wastes.
- B. ESTIMATED ANNUAL QUANTITY** — For each listed waste entered in column A estimate the quantity of that waste that will be handled on an annual basis. For each characteristic or toxic contaminant entered in column A estimate the total annual quantity of all the non-listed waste(s) that will be handled which possess that characteristic or contaminant.
- C. UNIT OF MEASURE** — For each quantity entered in column B enter the unit of measure code. Units of measure which must be used and the appropriate codes are:

ENGLISH UNIT OF MEASURE	CODE	METRIC UNIT OF MEASURE	CODE
POUNDS.....	P	KILOGRAMS.....	K
TONS.....	T	METRIC TONS.....	M

If facility records use any other unit of measure for quantity, the units of measure must be converted into one of the required units of measure taking into account the appropriate density or specific gravity of the waste.

#### D. PROCESSES

##### 1. PROCESS CODES:

**For listed hazardous waste:** For each listed hazardous waste entered in column A select the code(s) from the list of process codes contained in Item III to indicate how the waste will be stored, treated, and/or disposed of at the facility.

**For non-listed hazardous wastes:** For each characteristic or toxic contaminant entered in column A, select the code(s) from the list of process codes contained in Item III to indicate all the processes that will be used to store, treat, and/or dispose of all the non-listed hazardous wastes that possess that characteristic or toxic contaminant.

**Note:** Four spaces are provided for entering process codes. If more are needed: (1) Enter the first three as described above; (2) Enter "000" in the extreme right box of Item IV-D(1); and (3) Enter in the space provided on page 4, the line number and the additional code(s).

**2. PROCESS DESCRIPTION:** If a code is not listed for a process that will be used, describe the process in the space provided on the form.

**NOTE: HAZARDOUS WASTES DESCRIBED BY MORE THAN ONE EPA HAZARDOUS WASTE NUMBER** — Hazardous wastes that can be described by more than one EPA Hazardous Waste Number shall be described on the form as follows:

- Select one of the EPA Hazardous Waste Numbers and enter it in column A. On the same line complete columns B, C, and D by estimating the total annual quantity of the waste and describing all the processes to be used to treat, store, and/or dispose of the waste.
- In column A of the next line enter the other EPA Hazardous Waste Number that can be used to describe the waste. In column D(2) on that line enter "included with above" and make no other entries on that line.
- Repeat step 2 for each other EPA Hazardous Waste Number that can be used to describe the hazardous waste.

**EXAMPLE FOR COMPLETING ITEM IV (shown in line numbers X-1, X-2, X-3, and X-4 below)** — A facility will treat and dispose of an estimated 900 pounds per year of chrome shavings from leather tanning and finishing operation. In addition, the facility will treat and dispose of three non-listed wastes. Two wastes are corrosive only and there will be an estimated 200 pounds per year of each waste. The other waste is corrosive and ignitable and there will be an estimated 100 pounds per year of that waste. Treatment will be in an incinerator and disposal will be in a landfill.

LINE NO.	A. EPA HAZARDOUS WASTE NO. (enter code)	B. ESTIMATED ANNUAL QUANTITY OF WASTE	C. UNIT OF MEASURE (enter code)	D. PROCESSES

## DISPOSAL SITE EVALUATION REPORT

(LANDFILL)

LANDFILL RATING (LR) = Site Name GEORGIA PACIFIC PHYSICAL PLANT LANDFILL

PROHIBITED ACTS If any of the following exists or is indicated, LR = 0. Check.

- ☐ Burning (except by approved incineration method)
- ☐ Scavenging
- ☐ None of the above exists or is indicated by existing conditions

PERMITS (0, 15) Check appropriate blocks and state rating.

- A\* ☐ Site permitted

NOTE: If site is not permitted, but permit application has been submitted, check here ☐.

- ☐ Site being operated in accordance with permit, and design and operational plan

REQUIREMENTS Check appropriate blocks and state individual rating.

- A\* ☐ U\* ☐ 1. Spreading (0, 5)
- ☐ ☐ a. wastes spread into uniform layers (Layers 2 feet thick are generally recommended.)
- ☐ ☐ b. Size of the working face minimized
- ☐ ☐ 2. Compaction (0, 5)
- ☐ ☐ a. refuse compacted to smallest practical volume
- ☐ ☐ b. large bulky items properly compacted or excluded from disposal operation
- ☐ ☐ 3. Cover (0, 15)
- ☐ ☐ a. compacted
- ☐ ☐ b. clean earth
- ☐ ☐ c. 12 inch thickness (minimum)
- ☐ ☐ d. frequency of application not to exceed 30 days
- ☐ ☐ 4. Grading (0, 5)
- ☐ ☐ a. maintenance of existing eroded areas
- ☐ ☐ b. slope of surface of disposal area sufficient to maximize runoff and minimize erosion
- ☐ ☐ 5. Drainage (0, 5)
- ☐ ☐ a. adequate system of diversion ditches to minimize runoff onto the surface of the disposal area and/or drainage ditches to lower the water table
- ☐ ☐ b. adequate drainage provisions from the surface of the disposal area
- ☐ ☐ c. maintenance of drainage structures and ditches
- ☐ ☐ 6. Environmental Protection
- ☐ ☐ a. Air (0, 5)
- ☐ ☐ 1) dust control
- ☐ ☐ 2) odor control

<input type="checkbox"/>	<input type="checkbox"/>	b. authorized entrances closed when the site is not in operation	
		8. Fire Protection (0, 15)	<input type="text"/>
<input type="checkbox"/>	<input type="checkbox"/>	a. suitable means provided to prevent fires	
<input type="checkbox"/>	<input type="checkbox"/>	b. suitable means provided to control fires (Stockpiled earth is considered to be the most satisfactory fire fighting material.)	
ADDITIONAL STIPULATIONS (0, 5)			<input type="text"/>
(The following items are required for this disposal operation.)			
A*	U*	9. Site supervision (responsible individual at disposal site during operation)	
<input type="checkbox"/>	<input type="checkbox"/>	10. Unloading restricted to the working face or immediate vicinity	
<input type="checkbox"/>	<input type="checkbox"/>	11. Insect, rodent, bird, and animal control	
<input type="checkbox"/>	<input type="checkbox"/>	12. All-weather access roads	
<input type="checkbox"/>	<input type="checkbox"/>	13. Informational and directional signs posted	

Landfill Rating (LR) = \_\_\_\_\_. LR excluding prohibited acts \_\_\_\_\_.  
 LR must be greater than 85 to be an acceptable landfill.

A\* denotes acceptable parameter.

U\* denotes unacceptable parameter. (A single parameter for any requirement or the additional stipulations may be sufficient to preclude any score for that requirement or the additional stipulations.)

Comments:

The site has been graded & terraced to the appropriate slope & drainage pattern to prevent erosion from natural forces, providing however, proper spot-regrading is carried out after heavy rainfall. New ryx and bermuda grass is ~2" high on the entire site, but it is thin.

Continued growth of the vegetation cover & grading maintenance should be maintained.

FACILITY NAME Georgia Pacific Plywood Plant

ADDRESS P. O. Box 270, Highway 83

CITY Monticello

ZIP 31061

PERSON(S) CONTACTED (1) Terry Christiansen

TITLE Plant Manager - 468-6481

(2) Gerald Tice

Regional Environmental Engineer  
724-7151

TRIP BY Jennifer Kaduck

ACCOMPANIED BY Clyde Fehn

INVESTIGATION DATE 2/7/79

FOLLOW-UP DATE 8/7/79

REFERENCE FIR Investigation Date 2/7/79 and letter to Tice re. same

PROGRAM ACTIVITY Inspection and Compliance, Industrial (03)

ACTIONS	FINDINGS / DECISIONS	NEXT ACTIONS
Inspection, Initial (34)	Facility Not in Violation (71)	Inspection, Routine (38)

COMMENTS, CONCLUSIONS, AND RECOMMENDATIONS: During the inspection the following waste streams and their respective handling practices were noted. See FIR for volumes and more details.

(1) Log yard wastes. This material consists of bark and sand. Because of the large amount of sand, this waste stream presents no environmental problems as it is currently being handled by area filling. However, care must be taken to preclude damage to the settling lake through encroachment by the mass of bark waste. Considering the large amount of the waste generated by Ga. Pacific nationally, it is highly recommended that method of profitably marketing this unutilized resource be undertaken. Current land disposal practices will be increasingly expensive and difficult to manage properly as the mass

## COMMENTS, CONCLUSIONS, AND RECOMMENDATIONS (CONT.)

of waste increases. Utilization of a trommel system may prove effective in separating the sand and dirt from the clean bark.

- (2) Fly ash and scrubber sludge. This waste presents no environmental problems as currently handled by sub-surface land application. A long-term management plan for this waste by recycling through AMAX Resource Recovery Systems is more suitable, however, and is recommended.
- (3) Scrap Metal. Continued recycling of scrap metal is acceptable and encouraged.
- (4) Old landfill. The site has been properly closed by appropriate grading and initial steps in establishment of permanent vegetation. Periodic maintenance, especially after heavy rainfall, is necessary to prevent erosion. See LF Evaluation Report 2/7/79.

### Conclusions:

- (1) Solid waste management practices are considered in compliance with Ga. Rules and Regulations for Solid Waste Management.
- (2) We should not presently require a land disposal permit for accumulations on plant grounds of log yard waste, fly ash, and scrubber sludge.

### Recommendations:

- (1) Send the company a letter stating that they are in compliance with Georgia Rules and Regulations.

Time of inspection: 12:00 Noon Weather conditions: cloudy + cold  
Reason for inspection: ☐ Routine ☒ Other monitor closed landfill
